The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/523,712	Applicant(s) FUJIKAWA, TOMOKI	
	Examiner Danny Worrell	Art Unit 3765	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 31, 32, 34, 35, 36 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO2004/022827.

WO2004/022827 teaches the invention including weft knit elastic warp insert having elastic recover and breaking elongation within the ranges as claimed. However, it does not set forth the specific hysteresis loss of between about 20 and 45%. Given that the fabrics contain the same materials such a hysteresis loss would be inherent. To the extent that it may not be considered inherent it would have been obvious at the time the invention was made to provide the specific hysteresis as claimed in order to optimize the elastic characteristics of the fabric for a specific end use. Concerning the density and covering rate of the fabric, it would have been obvious at the time the invention was made to choose the specific density and covering rate of the fabric since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Art Unit: 3765

Allowable Subject Matter

Claims 33 and 38-59 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
